

Abstract

The travel industry is heavily taxed by travel agencies worldwide. The vulnerable industry has been hurt even more by the pandemic situation and a solution is needed.

To bring a glimmer of light to the travel industry NFTBOOKING is going to propose a new system of booking through the innovative instrument of NFTs, which are nowadays more than a tool used to commercialize different kinds of art in a digital form, NFTs are evolving into something bigger, expanding their functionality in the real world as well.

It will allow travel industry suppliers to take back a portion of the loss through a specific digital platform that will allow them to create and sell directly, part of their items. This process will help on one side suppliers into pre-selling particular accommodations packages and also save part of the huge commission paid to the middlemen, on the other side buyers to acquiring accommodations at the best possible prices, which can be used or resold, in some case at a higher price, depending on the circumstances. Not only this but the insurance that the hotels will never let them down by being the NFT a prepaid to the hotel room.

Specific

Boldest Goal

ease the tourism recovery by embracing the NFT's technology, by becoming a window of opportunities for travellers and suppliers.

Project Intent

Educate suppliers on how to approach the cryptocurrency world, from creating a wallet, to selling NFTs in different ways.

Offer a free, friendly platform to the travel industry market to create, store, sell and buy NFT.

Massive marketing strategy and meetings to begin to bring as many suppliers as possible from all over the world to join the project, starting from Europe and the US.

NFTBooking Structure

BOOK Token

BOOK is a BEP-20 token issued on the Binance Smart Chain with a total supply of 1 billion tokens. In order to do things correctly for the community, there wasn't a presale, indeed BOOK has been released with a fair launch instead.

Binance Smart Chain

The Binance Smart Chain is a blockchain network that runs in parallel to the Binance Chain. In contrast to the Binance Chain, BSC features smart contract functionality and compatibility with the Ethereum Virtual Machine (EVM). The Binance Smart Chain offers our community the added interoperability of facilitating their transactions through Ethereum-based wallets, such as MetaMask. An added advantage of issuing BOOK tokens on the BSC is that it offers an affordable blockchain experience through smaller transaction fees compared to the Ethereum Network, especially because all our work is based on NFTs.

PancakeSwap

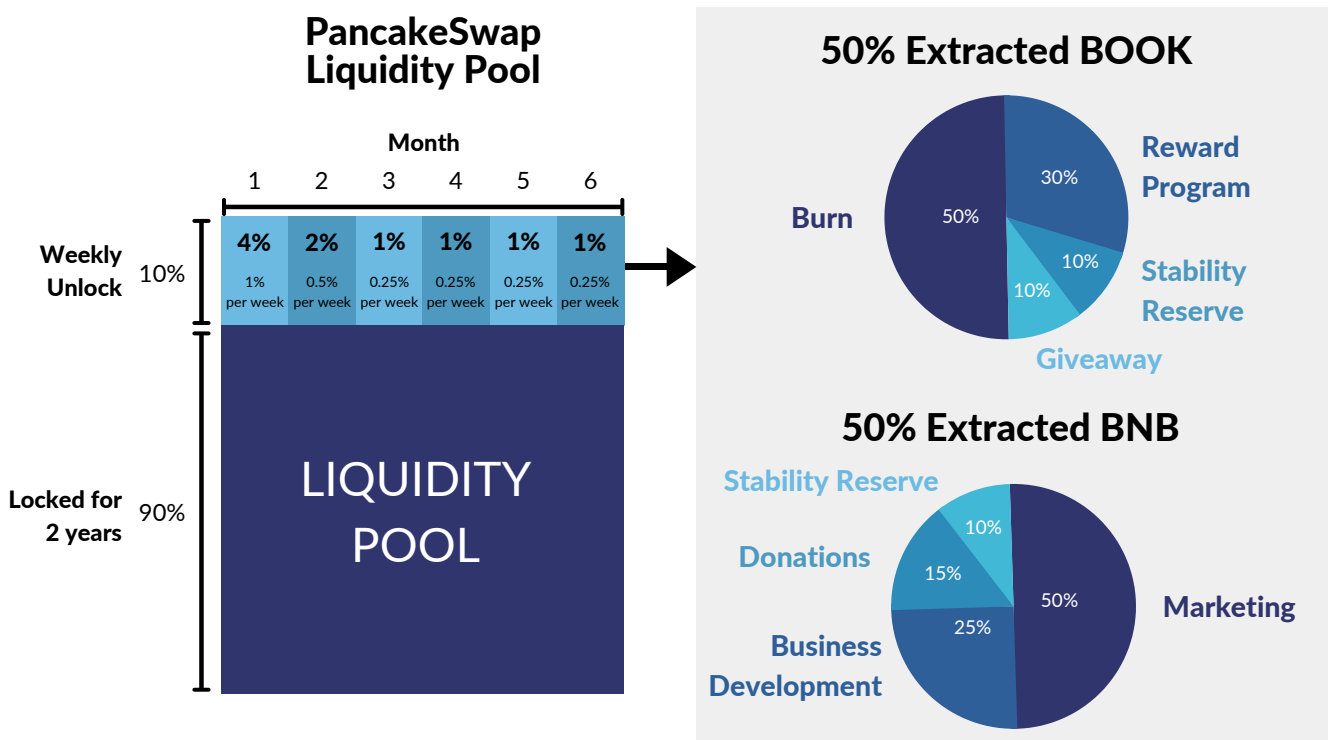

PancakeSwap is a Binance Smart Chain-based Decentralized Exchange (DEX) for swapping BEP-20 tokens. To facilitate BOOK's initial public offering, PancakeSwap offers our community the ability to exchange their BNB for BOOK. In line with a pragmatic approach, BOOK shall be listed into major exchanges shortly soon.

Tokenomics

Transactions

BOOK has a total supply of 1 billion tokens. The 90% of the liquidity Pool is locked for the initial two years, while a 10% gets unlocked weekly through 24 weeks for:

- Extracted BOOK: 50% burn, 30% reward program, 10% giveaways, 10% stability reserve;
- Extracted BNB: 50% marketing, 25% business development, 15% donations, 10% stability reserve.

There is a small 1% transaction fee built-in that goes into three different wallets handled by NFTbooking for the following functions:

- 0,5% PLATFORM SUSTAINABILITY;
- 0,25% INSURANCE WALLET;
- 0,25% REWARD PROGRAM.

NFTBooking

Upcoming Platform

Empowering tourism through NFTs, by allowing travel industry suppliers to create, store and sell their services as NFT on the upcoming platform NFTBOOKING for free. The decentralized platform works on the BSC.

The platform is powered by a deflationary utility token "BOOK", and users will be able to use their token to claim or issue NFT's.

Partially the whole travel industry will start working again in 2022, with a full recovery by 2025. NFTBOOKING is working on a beta version, a number of users will be selected to test the platform. They will be rewarded for the number of issues they find and report.

Reward Program

Users will get a reward every time they buy an NFT booking. Plus an extra if they are the ones that benefit from that booking and after they do a review about it.

This reward is valid for users that buy with BOOK.

You receive a 5% of the amount you paid, in BOOK, right after the purchase. And 5% extra after the review is submitted.

Users that buy with Fiat currency will also get a reward, but this will be 2,5% and 2,5%.

Donations

Donations are specific to redevelop ambient and touristic areas that may have lost attractiveness and have seriously damaged during the pandemic period.

Weekly we will propose different options where our community will be able to choose through polls.

Disclaimers

Information Published in the Whitepaper

The whitepaper provides information and material of general nature. You are not authorized and nor should you rely on the whitepaper for legal advice, business advice, or advice of any kind. You act at your own risk in reliance on the contents of the whitepaper. Should you decide to act or not act you should contact a licensed attorney in the relevant jurisdiction in which you want or need help. In no way are the contributors to the whitepaper responsible for the actions, decisions, or other behaviour taken or not taken by you in reliance upon the whitepaper. You are not authorized and nor must not should you rely on the whitepaper for legal advice, business advice, or advice of any kind.

Involvement Risks

The team does not recommend that any cryptocurrency should be bought, sold, or held by you. Do conduct your due diligence and consult your financial advisor before making any financial decisions. By purchasing BOOK, you agree that you are not purchasing a security or investment and you agree to hold the team harmless and not liable for any losses or taxes you may incur. You also agree that the team is presenting the token "as is" and is not required to provide any support or services. You agree that by purchasing or exchanging BOOK tokens you may not claim any tax, fee, reward or any transaction or activity from BOOK, nor any of the BOOK team members, nor any other third-party. Any functionality of the BOOK application, the BOOK Token as well as the BOOK Project mentioned within the present whitepaper is purely technical and not related to any legal claim of a BOOK token holder.

Compliance With Tax Obligations

The team does not guarantee compliance with any country across the world. Always make sure that you comply with your local laws and regulations before you make any purchase.

No Warranties

The Whitepaper is provided on an “as is” basis without any warranties of any kind regarding the whitepaper and/or any content, data, materials, and/or services provided on the whitepaper.

Limitation of Liability

Unless otherwise required by law, in no event shall the contributors to the whitepaper be liable for any damages of any kind, including, but not limited to, loss of use, loss of profits, or loss of data arising out of our in any way connected with the use of the whitepaper.

Future Statements

There may be matters in this whitepaper that are forward-looking statements. Such statements are subject to risks and uncertainty. Participants are cautioned not to place undue reliance on these forward-looking statements. The actual results or event that transpires afterwards may be different from what is implied here. The team shall not guarantee the accuracy of the forward-looking statements outlined in this whitepaper.
